

Service Description

N-BAU-20001 Managed Firewall FortiGate 30D

Rev2 – June 2016

About Net Support UK

Net Support UK offers cloud solutions with smart advice and support. There's no doubt that we're experts.

We think, act and deliver differently to other IT companies by taking a 'blank paper' approach to every challenge and start by listening to what our customers want to do with their business.

For over 17 years we've kept ourselves savvy with the top tech and avoided the traps of a 'brands only' approach. It's all about the whole team working together and there's nothing more rewarding than seeing great ideas put into practice - and our customers' businesses grow as a result.

Service Description

Service Code	N-BAU-20001
Service Family	Net Support UK
Service Title	Managed Firewall – FortiGate 30D

Service Overview

Service Outline

Complete Managed Firewall Service based on the FortiNet FortiGate 30D (FG-30D) entry level firewall. This service is suitable for Small Office \ Home Office deployments up to 30 Users with little or no requirement for VPN \ Remote Access provision.

This is delivered as a service and all hardware and licensing remains the property of Net Support UK.

Net Support UK Retain administrative control of the device throughout the contract. The client may be granted Read-Only access to the firewall on request.

Service Availability

This service is available as a standalone product for new and existing business customers. The service requires the customer to have at least one single static public IPv4 address that can be allocated to the device.

Applicable Service Level Agreement

This product is covered by the Net Support UK Ltd Managed Firewall Services SLA.

Applicable Terms and Conditions

Net Support UK Ltd General Terms and Conditions for Business Services apply.

Contract Periods and Cancellations

Standard Minimum Contract Period for this service is 36 months. Shorter contract periods may attract increased setup charges. Cancellation terms are included in the Terms and Conditions referenced above.

Delivery

Typical lead time for this product is 10 working days. Equipment is configured remotely and shipped to customer site for customer installation. Next business day shipping within the mainland United Kingdom is included in the setup charges. Telephone / Remote support is available during customer installation. Installation by Net Support UK engineers is available at additional cost which will be dependent on location.

Monitoring & Reporting

The service is available in two levels of management wrap (see Options below), which have differing levels of monitoring and reporting. These are described in detail in the Managed Firewall Service Level Definition document.

Customer Presentation

The FG-30D is a 'desktop' unit and is supplied with the following:

- UK Power Adapter
- 2 x 1.5m RJ45 cables

The unit must be deployed in a suitable 'office' environment. The unit is not intended for external use or use in harsh environmental conditions.

Base Configuration

Base Configuration includes the following:

- Updating to latest Net Support UK Approved Firmware
- Registration of device with manufacturer
- Configuring up to two WAN Interfaces for basic Active Passive failover
- Configuring up to two Internal Zones (e.g. LAN and Guest) with IP allocations to customer specification or using NSUK defaults
- Configuring DHCP Services if required on up to two Internal Interfaces
- Configuring Basic Firewall Policies: Allow all LAN-WAN, Deny all WAN-LAN
- Documentation of and off-site storage of As-Deployed Initial Configuration

Service Options

Managed Service Levels

The service is available in one of two Managed Service Levels:

L1 – Basic Managed Service (The default level)

L2 – Enhanced Managed Service including change budget, monthly reporting and proactive firmware management.

Feature Options

Universal Threat Management Features

BDL – Complete UTM Bundle including AV filtering, AntiSpam, Intrusion Prevention System (IPS) and web content filtering. Note that enabling some or all of these features may significantly impact firewall throughput. Net Support UK can advise on likely impact.

Setup Options

Custom Setup

ADV – Advanced setup. This includes the configuration of up to 10 non-standard policies and rules including; firewall rules, UTM Policies, IPSec VPN Tunnels, SSL VPN Access, Bandwidth Management and load balancing policies

CUST - Net Support will liaise with the customer and their IT \ Network teams to design and deploy a custom setup suited to the customer requirements. This optional service will be consultatively driven and is subject to varying charge based on levels of complexity required.
